Computer Science undergraduate specialising in machine learning, deep learning, and AI research, with publications in Springer, IEEE, and CEUR-WS. Experienced in scalable ML systems, experimental research, data analytics, and international multidisciplinary collaborations.

EDUCATION

Information Technology University (ITU)

BS Computer Science

2023 – Present
Lahore, Pakistan

- Coursework: Machine Learning, Data Science, Computer Vision, Algorithms, Databases, Software Engineering

EXPERIENCE

CAAISC (ITU)

Research Lead

Feb 2025 – Present
Lahore, Pakistan

- Lead AI research teams, building AI safety protocols involving experimentation, benchmarking, and statistical evaluation [Team]

ITU

Teaching Assistant, Algorithms

Feb 2026 – Jun 2026
Lahore, Pakistan

- Support instruction and assessment for undergraduate Algorithms course; assist students with problem-solving and algorithmic reasoning

NUST

Undergraduate Research Assistant

Jun 2025 – Dec 2025
Islamabad, Pakistan

- Co-authored and first-authored papers accepted at ICSLE 2025 and XAI-Ed 2026 [XAI-Ed Paper] [ICSLE Paper]

Turing

AI Model Evaluator

Jul 2024 – Feb 2025
Remote

- Evaluated large language models including GPT-4 and Gemini 2.5, benchmarking reasoning quality by RHLF and SFT

PROJECTS

Stroke Detection with Quantization & Grad-CAM

- Built CNN-based brain stroke detection models achieving 93% test accuracy; applied Grad-CAM for interpretability and post-training quantization achieving $\sim 4\times$ model compression with negligible accuracy loss (GitHub)

Quantum Neural Networks for Wind Energy Forecasting

- Developed hybrid quantum-classical neural network architectures for wind energy time-series forecasting; achieved R^2 of 0.91, outperforming classical LSTM baseline; led modelling, experimentation, evaluation, and manuscript preparation

Network Intrusion Detection using Machine Learning

- Built end-to-end ML pipelines on NSL-KDD and CIC-IDS2017 datasets achieving 98.6% F1-score; covered feature engineering, classification modelling, optimization, and large-scale evaluation (GitHub)

Leukemia Detection using Graph Machine Learning

- Designed graph-based deep learning workflow modelling biological feature relationships for AML vs. ALL classification; achieved 97% train and 94% test accuracy using representation learning (GitHub)

RESEARCH & PUBLICATIONS

- XAI-Ed 2026 (CEUR-WS)** 1st author; accepted explainable AI publication [Paper]
- ICSLE 2025 (Springer LNCS)** Co-author; accepted peer-reviewed publication [Paper]
- Digital Twins Scoping Review, Qatar University** Under review in IEEE
- Neuro & Mental Health Research Initiative, Qatar** Contributor in interdisciplinary AI research project [Post]
- Quantum Neural Networks for Wind Energy Forecasting, Yildiz Technical University** Under review in IEEE

ACHIEVEMENTS

- AIC by CNES and ESA 2026** National winner; selected for international finals in France [Link]
- NASA Space Apps Challenge 2024** National Winner & Global Nominee [Link]
- QRDI Council, Qatar** Contributor to \$300,000 funded neuroscience and AI research initiative [Link]
- Innovative Pakistan 2026** Runner-up among 1,000+ projects and 8,000+ participants [Link]
- Media Appearances** Featured on Express News [Video], 24 News [Video], PTV [Video], and ITU Podcast [Video]
- NEBULA Magazine** Published author; available on Amazon Kindle [Link]
- g.tec BCI & Neurotechnology Spring School** Completed 130 hours of advanced BCI and neurotechnology training

LEADERSHIP

- Founder & President, NEBULA** Built interdisciplinary scientific community connecting 1,000+ students across universities [Instagram]
- Lead Organiser, IBM Qiskit Fall Fest Pakistan** Delivered technical workshops for 250+ students [Badge] [Instagram] [Website] [IYQ]
- Local Co-Lead, NASA Space Apps Lahore 2025** Coordinated national hackathon engaging 2,000+ participants [LinkedIn] [Event]

SKILLS

Programming: Python, SQL, Git, GitHub, Linux, Docker, Jupyter, Google Colab

Machine Learning: PyTorch, Sk-learn, Pandas, NumPy, HuggingFace, Neural Networks, LLM Evaluation, Feature Engineering

Deep Learning: Representation Learning, Generative AI, Graph ML, Supervised Learning, Self-Supervised Learning, GPU Training Pipelines

Research: Technical Writing, Scientific Publishing, Experimental Design, Statistical Analysis, Cross-functional Collaboration
